Project description and details:

We need to build website for int-trade.co.uk

Website needs to showcase products related to medical and clinical products.

It needs to have ability to add product and publish and unpublish so those published product is visible to visitor and with unpublish capabilities we can take it off from website.

Following section we need :

Home

About

Product

ContactUs

Above menus should be floating and must be visible and hanging while scrolling.

Website must responsive for touch devices such as smart phones and tablets.

Footer or bottom of page should have Company details such as address, quick links, copy right details and credit link for developer (us – Vaagha)

Above footer , we should have small contact us form along with link to phone, email, opening hours and our location (google map link)

Home page – should have product slide show.

Product add option through admin module – we should be able to add product with following details , Title, Product Code, 3-4 points for description and call to action button to ask for quote (get quote)

When product is publish it should have some hover effect like zoom and option to call to buy or ask for quote
